Bachelor's degree in Information Systems.
@ São Paulo State University (UNESP)
Since 2003

Portuguese : Mother Tongue
English: Advanced
Spanish: Intermediary
Italian, French : Basic

Most Used

BackEnd	PHP (Symfony	Laravel)	Golang
FrontEnd	TypeScript	SASS	JavaScript	ReactJS	jQuery
Agile	Jira	Trello	RunRun.it
DevOps	Linux	Docker	circleCI	sonarCloud
DataBase	MySql	MongoDB	Postgres
Mobile	Kotlin
Techniques	Microservice	API	OOP	Ajax	TDD	BDD	EDD
Want to Learn	Machine Learning	Data Science	DevOps Automation	DevSecOps

Formal Work Experience

Alooba	FullStack Software Engineer. My daily activities are basically to kill bugs on legacy app and develop new features on the v2 app. Besides the coding, I also have to : Test and/or Code review other co-workers tasks.
NetSar	Senior PHP Programmer. I was **leading** a small team (me plus 2 programmers, occasionally a designer) responsible for re-write the old scripts into a new **Symfony** based platform . Eventually, I did write codes for new features . Most of the system was based on **SOAP/REST.**

I am multitasking with vast tech knowledge: I can fit in many positions in the IT team.
My interests go through UI/UX, AR, Machine Learning, Data Science and other. Keep scrolling to see my full Curriculum.

Diego Favero   *Full Stack WebDeveloper (full CV)*

Common Used Tools

#PHP   **#MYSQL**   **#GOLANG**

#REACT   **#LINUX**   **#JAVASCRIPT**

#SYMFONY   **#TYPESCRIPT**   **#DOCKER**

About me :

I have been using **PHP** and its 'sidekicks' for web development since **1999** when I started to be an intern in the university's computer's lab.

Today I am able to work in any stage from a system development:

Since analyzing system requirements, going through server setup, database design and administration, team managing, coding (Structure, **Backend** and Frontend), test and deployment !

Currently, I have based my personal projects on **microservice** architecture. Using **Golang** as BackEnd .

I am really up to start to learn new technologies.

Today, I consider myself a better fit as a **backend developer** than frontend.

I Have a good knowledge about Photography, Video Editing and Audio Production, able to use many softwares such as Adobe suite, Logic Pro, Ableton Live and many others.

I have been DJing since 2007.

As a hobby I like outdoor sports such as rock climbing, trekking and mountain biking, and sometimes, I make awesome woodwork ! (Most of my house's furniture is made by me) .

Technical Skills

Level 8 (I would be able to perform a workshop of these right now)

PHP   OOP   Mysql

Level 7 (I can work very well using these, with some kind of expertise)

Javascript   Jquery   Symfony
PHPStorm (IDE)   OSX   Linux

Level 6 (I Can do it ! Maybe I 'll use google to check any syntax or a forgotten detail)

GoLang   API   TypeScript
Mysql Server   Git   AWS
SOAP/REST   SEO   DBA
Kotlin   Docker   TDD
React   Nginx   BDD
CSS3   SASS/LESS   HTML5

Level 5 (I can do it ! I have already used it ! Just give a few days on google)

XML   Vue .js   Design Patterns
Node.js   Angular   SSL / HTTPS

Level 4 (tools I already used, but not that much, so I am able to use it)

ExtJS   Kendo UI   CodeIgniter

Level 3 (I know what is and how to apply, but never worked using those before)

Ruby   NoSql   WordPress
Bootstrap   Pearl   Kubernetes

Level 2 (Languages I learned in college, but never used professionally)

C, C++   Java   Pascal
Cobol   Lua   Delphi
Assemble   Fortran   ASP

Education:

Title : Bachelor
Course : Information Systems Bachelor's Degree at **UNESP** (Sao Paulo State University)
from March 1999 until December 2003

The Course, basically, is a shortened form of Science Computers **plus** company management course. In short words : **It teaches how to apply computers based systems for companies** .

* Original title in portuguese : Bacharelado em Sistemas de Informação.
** The [Information Systems Bachelor](#) at UNESP is the first course of its kind in Brazil. And since them it has been always ranked as #1 in Brazil.
***The [Sao Paulo State University](#) is in the top 4 Brazilian Ranking and it is in the top 400 world wide.

Languages Skills

Portuguese (pt-BR) : native speaker.

English : Advanced
        I (really) learned English when was **living** in Amsterdam (2008-2009), today I could say that I am aware of my strong Brazilian accent, also a few mess when need to use 'in', 'on', 'at', etc, although, I think I can **express** myself clearly enough to hold any kind of conversation, written or **spoken**.

Spanish : Intermediary
        Due to its **similarity** to portuguese, I can understand spanish very well when spoken and fully when read . But I can not speak as good as I speak English

French/Italian : Self Learning

        Like Spanish, these other **latin** languages are kind of easy to understand, but I still don't get much of it when spoken. I just need a bit more practice.

Work Experience

_ [Alooba](#) **FullStack Software Engineer Jul 2020 — Current**
Australian Based Company - Home Office.

It is a startup company from Australia which recently got a substantial investment. It provides **solutions** for hiring processes focused on Data Sciences roles.

My function is to maintain the current software and develop new features. Using Laravel, PHP, Postgres and React/TypeScript.

_ [NetSar](#) **Senior PHP Programmer nov 2012 — Jul 2014**
Brazilian Based Company - Home Office

It is a medium software company in Brazil providing **solutions** for travel shop's. It was a home based job. I was **leading** a small team (me plus 2 programmers, occasionally a designer) responsible for re-write the old scripts into a new **Symfony** based platform . Eventually, I did write codes for new features . Most of the system was based on **SOAP/REST** servers !

Reason for getting off : In may 2014 I had a motorcycle crash, which costs me three broken ribs, a pierced lung, a week in the hospital and almost my life. After that I decided to give myself some time so I asked to get off for travel.

_ [Advosoft](#) **PHP Developer Jun 2012 — Oct 2012**
USA Based company. - Home Office

It was a home based job. I was simply coding new **features** according to the projects previously sent through some collab tool .

Reason for getting off : They let me go without further explanation.

_ [Ecentry](#) **Jr PHP Developer - Jan 2010 — Dec 2011**
Brazil Based Company - Office Based Job

I Was working on a Fidelity Program System owned by **Lufthansa** Flight Company. This system is responsible for managing the Fidelity Points Program for the ones who sell Lufthansa tickets . It was a huge system within almost **2M** users, translated into more than 80 **languages**.

I had two main **functions** :

1 - **Maintenance** : Had to quickly fix any reported bug.
 2 - New Interface and Database **Optimization** : While no bugs were reported, I had a mission to check and optimize the **SQL's** query and system performance. To do so, I was migrating all queries to be executed by **Python** Scripts.

The new interface was developed using **ExtJS** Framework.

 Reason to get off : I was sick of having to spend two hours every day into the Brazilian mad traffic . After being denied to work home based, I asked to quit !

My Goals

_ **MultiTask** and vast tech knowledge : I can fit in **many** positions in the IT department.
_ Can travel or move in **anytime**.
_ Dare me on new challenges !
_ I think 'out the **box'** and love to learn.
_ I can inject new market vision ('cause I live the **Brazilian** reality, would be a nice info and **experiences** exchange about this huge and growing marketing we have around here).

Interests

Augmented Reality	**UI / UX**	New Technologies
Qubits	Data Security	Networks
Big Data	Machine Learning	IA

Interests beyond IT

A few things I like to do and **learn** about in my spare time :

_ Photo / Video / Audio Production and Edition
_ Sports -> Climbing, Mountain bike, Surf, SlackLine and Trekking.
_ Healthier life and food .
_ Travel
_ Quantum physics.
_ Yoga and Capoeira .
_ Politics and Economy .
_ Dogs .
_ Simple Life .
_ Carpenter and Architecture .

Why hire me ?

Because I have a full **domain** about how to attend to the job needs (if hooded by my **skills**, otherwise, I am fully open to learn it) with a few pluses acquired by life experience. And, I have a passion for working with **technologies** !

Want to see more ?

Please, ask for a code sample and I will be glad to send a few files with pieces of code I've written
