Common Used Tools

#PHP	**#MYSQL**	**#GOLANG**
#UI UX	**#LINUX**	**#JAVASCRIPT**
#SYMFONY	**#KOTLIN**	**#DOCKER**

About me :

I have been using **PHP** and its 'sidekicks' for web development since **1999** when I started to be an intern in the university's computer's lab.
Today I am able to work in any stage from a system development:
Since analyze system requirements, going thru server setup, database design and administration, team managing, coding (Structure, **Backend** and Frontend), test and deployment !
Currently, I have based my projects on **microservice** architecture. Using **Golang** as BackEnd .
I am really up to start to learn new technologies.
Today, I consider myself better fit as backend **developer** than frontend.

I Have a good knowledge about Photography, Video Editing and Audio Production, able to use many softwares such as Adobe suite, Logic Pro, Ableton Live and many others.
I have been DJing since 2007.
As a hobby I like outdoor sports such as rock climbing, trekking and mountain bike, and sometimes, I make awesome woodwork ! (Most of my house's furniture are made by me) .

Technical Skills

Level 8 (I would be able to perform a workshop of these right now)

PHP	OOP	Mysql

Level 7 (I can work very well using these, with some kind of expertise)

Javascript	Jquery	Symfony
PHPStorm (IDE)	OSX	Linux

Level 6 (I Can do it ! Maybe I 'll use google to check any syntax or a forgotten detail)

GoLang	API	Apache
Mysql Server	Git	AWS
SOAP/REST	SEO	DBA

Level 5 (I can do it ! I have already used it ! Just give a few days on google)

Kotlin	Docker	TDD
XML	Python	Design Patterns
Node.js	Angular	React
Vue .js	Nginx	SSL / HTTPS

Level 4 (tools I already used, but not that much, so I am able to use it)

ExtJS	Kendo UI	CodeIgniter
CSS3	SASS/LESS	HTML5

Level 3 (I know what is and how to apply, but never worked using those before)

Ruby	NoSql	WordPress
Bootstrap	Pearl	Kubernetes

Level 2 (Languages I learned in college, but never used professionally)

C, C++	Java	Pascal
Cobol	Lua	Delphi
Assemble	Fortran	ASP

Education:

Title : Bachelor
Course : Information Systems Bachelor's Degree at **UNESP** (Sao Paulo State University)
from March 1999 until December 2003

The Course, basically, is a shortened form of Science Computers **plus** company management course. In short words : **It teaches how to apply computers based systems for companies** .

* Original title in portuguese : Bacharelado em Sistemas de Informação.
** The Information Systems Bachelor at UNESP it is the first course of its kind in Brazil. And since them it has been always ranked as #1 in Brazil.
***The Sao Paulo State University is into top 4 Brazilian Ranking and it is in top 400 world wide.

Languages Skills

Portuguese (pt-BR) : native speaker.

English : Advanced

    I (really) learned English when was **living** in Amsterdam (2008-2009), today I could say that I am aware of my strong Brazilian accent, also a few mess when need to use 'in', 'on', 'at', etc, although, I think I can **express** myself clearly enough to hold any kind of conversation, written or **spoken**.

Spanish : Intermediary

    Due to its **similarity** to portuguese, I can understand spanish very well when spoken and fully when read . But I can not speak as good as I speak English

French/Italian : Self Learning

    Like Spanish, these other **latin** languages are kind of easy to understand, but I still don't get much of it when spoken. I just need a bit more practice.

Work Experience

_ [NetSar](#) **Senior PHP Programmer nov 2012 — Jul 2014**
Brazilian Based Company - Home Office

It is a medium software company in Brazil providing **solutions** for travel shop's. It was home based job. I was **leading** a small team (me plus 2 programmers, occasionally a designer) responsible for re-write the old scripts into a new **Symfony** based platform . Eventually, I did write codes for new features . Most of the system was based on **SOAP/REST** servers !

Reason for getting off : In may 2014 I had a motorcycle crash, which costs me three broken ribs and a pierced lung, a week in the hospital and almost cost my life. After that I decided to give myself some time so I asked to get off for travel.

_ [Advosoft](#) **PHP Developer Jun 2012 — Oct 2012**
USA Based company. - Home Office

It was home based job. I was simply coding new **features** according to the projects previous sent thru some collab tool .

Reason to getting off : They let me go without further explanation.

_ [Ecentry](#) **Jr PHP Developer - Jan 2010 — Dec 2011**
Brazil Based Company - Office Based Job

I Was working on a Fidelity Program System owned by **Lufthansa** Flight Company. This system responsible for managing the Fidelity Points Program for the ones who sells Lufthansa tickets . It was a huge system within almost **2M** users, translated into more than 80 **languages**.

I had two main **functions** :

1 - **Maintenance** : Had to quickly fix any reported bug.
 2 - New Interface and Database **Optimization** : While no bugs were reported, I had a mission to check and optimize the **SQL's** query and system performance. To do so, I was migrating all queries to be executed by **Python** Scripts.

The new interface was developed using **ExtJS** Framework.

 Reason to getting off : I was sick to have to spend two hours every day into the Brazilian mad traffic . After been denied to work home based, I asked to quit !

My Goals

_ **MultiTask** and vast tech knowledge : I can fit in **many** positions into IT department.
_ Can travel or move in **anytime**.
_ Dare me on new challenges !
_ I think 'out the **box'** and love to learn.
_ I can inject new market vision ('cause I live the **Brazilian** reality, would be a nice info and **experiences** exchange about this huge and growing marketing we have around here).

Interests

Augmented Reality	**UI / UX**	New Technologies
Qubits	Data Security	Networks
Big Data	Machine Learning	IA

Interests beyond IT

A few things I like to do and **learn** about in my spare time :

_ Photo / Video / Audio Production and Edition
_ Sports -> Climbing, Mountain bike, Surf, SlackLine and Trekking.
_ Healthier life and food .
 _ Travel
_ Quantum physics.
_ Yoga and Capoeira .
_ Politics and Economy .
_ Dogs .
_ Simple Life .
_ Carpenter and Architecture .

Why to hire me ?

Because I have a fully **domain** about how to attend the job needs (if hooded by my **skills**, otherwise, I am fully open to learn it) with a few pluses acquired by life experience. And, I have a passion for work with **technologies** !

Please, take a look on my [Cover Letter](#) to know a bit more about me .
